#### A Look at our Three Series of Examination Room Tables

As most of you know, Hamilton Medical manufactures three different series of Medical Exam Room Tables at this time. This month we would like to provide you with a capsule on each series.

##### MEDALLION Series

The Medallion Series of Power Examination Tables and accessories are designed to be our "sensible" response to the basic power needs of any healthcare examination suite.

MEDALLION II EC

All Medallion Tables operate with high-low power and can be configured with either a manual or power backrest. They include an integrated slide basin/leg rest system, seamless upholstered top, powered height position and our quiet electromechanical drive system with foot control. As an added benefit for this unique power alternative, an all steel two drawer unit may be added under the back rest. A complete variety of optional accessories are also available.

The base is Chameleon (beige) and five standard color choices are offered for the upholstery as well as your option of custom colors.

##### VERSATILITY Series

HI-LO with POWER BACK

BARIATRIC FLAT TOP

The Versatility Tables offer fixed and variable height. These treatment tables feature two different base designs which maximize patient comfort while maintaining optimal efficiency of floor space.

The Hi-Lo Versatility tables offer power elevation of height with the option of a powered back rest.

(continued next column)

Both the Versatility Treatment Tilt Top and our very popular Bariatric Flat Top (which has an 800 pound load capacity) have Hamilton's unique reinforced cross-base frame and outrigger design.

All Versatility Tables offer a seamless, easy-to-clean, stain resistant upholstered top with comfortable high-density foam. Our distributors love the fact that Versatility Tables offer a distinctively strong alternative to the market.

You can configure the Versatility with one or two of our all steel two-drawer units, an extended 78 inch table length and of course, your choice of colors and options.

##### E2 Series

E2 MILLENNIUM WITH PREMIUM TOP

E2 S2

The E2 Series of traditional exam tables and accessories offer a cost effective solution for cost containment in healthcare examination equipment. Our full service tables can be outfitted with a multitude of the features and benefits your customers desire. They include instrument warmer, stainless steel treatment/drain pans, knee crutches as well as many optional accessories.

The base is a standard chameleon with the selection of five colors on our **Quick Ship** program. Other colors and custom tops are available as well. Contact us at **888-871-5600** or [sales@hamiltonmed.com](mailto:sales@hamiltonmed.com) for pricing and complete information.
